Author Index

A

Abney, R. *See* Steinberg, Adams, Morrison, Pullen, Abney, Ibrahim, and Rieder.

Aceto, R. M. *See* Epstein, Loutzenhiser, Friedland, Aceto, Camargo, and Atlas.

Ackermann, K. E. *See* Chang, Tomlinson, Jeffrey, Tilton, Sherman, Ackermann, Berger, Cicero, Kilo, and Williamson.

Adams, J. G., III *See* Steinberg, Adams, Morrison, Pullen, Abney, Ibrahim, and Rieder.

Adkins, B. A., Myers, S. R., Hendrick, G. K., Stevenson, R. W., Williams, P. E., and Cherrington, A. D. Importance of the route of intravenous glucose delivery to hepatic glucose balance in the conscious dog. 557

Adler, S. *See* Johnson, Couser, Chi, Adler, and Klebanoff.

Aftring, R. P. *See* Block, Aftring, Mehard, and Buse.

Agostino, N. *See* Bonagura, Mendez, Agostino, and Pernis.

Ahmed, M. *See* Nakagawa, Ahmed, Hall, Deganello, and Coe.

Ahrens, E. H., Jr. *See* McNamara, Kolb, Parker, Batwin, Samuel, Brown, and Ahrens.

Alfrey, A. C. *See* Sedman, Alfrey, Miller, and Goodman.

Allegra, C. J., Kovacs, J. A., Drake, J. C., Swan, J. C., Chabner, B. A., and Masur, H. Potent in vitro and in vivo antitoxoplasma activity of the lipid-soluble antifolate trimetrexate. 478

—, *See* Baram, Allegra, Fine, and Chabner.

Allen, J. B. *See* Wilder, Allen, and Hansen.

Alper, C. A., Fleischnick, E., Awdeh, Z., Katz, A. J., and Yunis, E. J. Extended major histocompatibility complex haplotypes in patients with gluten-sensitive enteropathy. 251

Alpern, R. J. Apical membrane chloride/base exchange in the rat proximal convoluted tubule. 1026

Alt, F. *See* Bellon, Manheimer-Lory, Monestier, Moran, Dimitriu-Bona, Alt, and Bona.

Amendt, B. A., Greene, C., Sweetman, L., Cloherty, J., Shih, V., Moon, A., Teel, L., and Rhead, W. J. Short-chain acyl–coenzyme A dehydrogenase deficiency. Clinical and biochemical studies in two patients. 1303

Amento, E. P. *See* Granstein, Murphy, Margolis, Byrne, and Amento.

Anderson, D. K. *See* Sadrzadeh, Anderson, Panter, Hallaway, and Eaton.

Anderson, M. J. *See* Potter, Potter, Hatton, Chapel, Anderson, Pattison, Tyrrell, Higgins, Willman, Parry, and Cotes.

Andersson, S. *See* Clayton, Leonard, Lawson, Setchell, Andersson, Egestad, and Sjövall.

Andersson, T., Dahlgren, C., Lew, P. D., and Stendahl, O. Cell surface expression of fMet-Leu-Phe receptors on human neutrophils. Correlation to changes in the cytosolic free Ca^{2+} level and action of phorbol myristate acetate. 1226

Andreoli, S. P. *See* Moore, Andreoli, Esmon, Esmon, and Bang.

Andres, G. *See* Matsuo, Fukatsu, Taub, Caldwell, Brentjens, and Andres.

Andrews, R. G. *See* Bernstein, Singer, Andrews, Keating, Powell, Bjornson, Cuttner, Najfeld, Reaman, Raskind, Sutton, and Fialkow.

Ang, S. *See* González-Sarmiento, LeBien, Bradley, Greenberg, Seidman, Ang, and Kersey.

Anson, D. S. *See* Matthews, Anson, Peake, and Bloom.

Aratan-Spire, S. *See* Leduque, Jackson, Kervran, Aratan-Spire, Czernichow, and Dubois.

Arend, L. J., Sonnenburg, W. K., Smith, W. L., and Spielman, W. S. A_1 and A_2 adenosine receptors in rabbit cortical collecting tubule cells. Modulation of hormone-stimulated cAMP. 710

Arenson, D. M. *See* Bissell, Arenson, Maher, and Roll.

Arias, I. M. *See* Roy Chowdhury, Gross, Moscioni, Kram, Arias, and Roy Chowdhury.

Arnaout, M. A. *See* Dana, Clayton, Tennen, Pierce, Lachmann, Law, and Arnaout.

Arner, P. *See* Marcus, Karpe, Bolme, Sonnenfeld, and Arner.

Aronson, P. S. *See* Schild, Giebisch, Karniski, and Aronson.

—, *See* Soleimani, Grassl, and Aronson.

Arrigo, D. A. *See* Chong, Nicolosi, Rodger, Arrigo, Yuan, MacKey, Georas, and Herbert.

Arthus, M.-F. *See* Bichet, Arthus, Barjon, Lonergan, and Kortas.

Asch, A. S., Barnwell, J., Silverstein, R. L., and Nachman, R. L. Isolation of the thrombospondin membrane receptor. 1054

Atlas, S. A. *See* Epstein, Loutzenhiser, Friedland, Aceto, Camargo, and Atlas.

Aune, T. M. *See* Schnaper and Aune.

Austin, S. D. *See* Brinckerhoff, Ruby, Austin, Fini, and White.

Awad, J. *See* Hitman, Niven, Festenstein, Cassell, Awad, Walker-Smith, Leonard, Fry, Ciclitira, Kumar, and Sachs.

Awdeh, Z. *See* Alper, Fleischnick, Awdeh, Katz, and Yunis.

Ayuso, R. *See* Helderman, Ayuso, Rosenstock, and Raskin.

B

Bækkeskov, S., Landin, M., Kristensen, J. K., Srikanta, S., Bruining, G. J., Mandrup-Poulsen, T., de Beaufort, C., Soeldner, J. S., Eisenbarth, G., Lindgren, F., Sundquist, G., and Lernmark, Å. Antibodies to a 64,000 M_r human islet cell antigen precede the clinical onset of insulin-dependent diabetes. 926

Bajaj, M. S., Rana, S. V., Wysolmerski, R. B., and Bajaj, S. P. Inhibitor of the Factor VIIa–tissue factor complex is reduced in patients with disseminated intravascular coagulation but not in patients with severe hepatocellular disease. 1874

Bajaj, S. P. *See* Bajaj, Rana, Wysolmerski, and Bajaj.

Ballieux, R. E. *See* Lokhorst, Boom, Bast, Peters, Tedder, Gerdes, Petersen, and Ballieux.

Balschi, J. A. *See* Bittl, Balschi, and Ingwall.

Banda, M. J., Clark, E. J., Sinha, S., and Travis, J. Interaction of mouse macrophage elastase with native and oxidized human α_1-proteinase inhibitor. 1314

Bang, N. U. *See* Moore, Andreoli, Esmon, Esmon, and Bang.

Baqar, S. *See* Levine, Herrington, Murphy, Morris, Losonsky, Tall, Lindberg, Svenson, Baqar, Edwards, and Stocker.

Baram, J., Allegra, C. J., Fine, R. L., and Chabner, B. A. Effect of methotrexate on intracellular folate pools in purified myeloid precursor cells from normal human bone marrow. 692

Baranetsky, N. G. *See* Chertow, Blaner, Baranetsky, Sivitz, Cordle, Thompson, and Meda.

Baricos, W. H. *See* Shah, Baricos, and Basci.

Barjon, J. N. *See* Bichet, Arthus, Barjon, Lonergan, and Kortas.

Barlet, C., and Doucet, A. Triiodothyronine enhances renal response to aldosterone in the rabbit collecting tubule. 629

Barnett, C. *See* Blair, Feldman, Barnett, Walsh, and Richardson.

Barnwell, J. *See* Asch, Barnwell, Silverstein, and Nachman.

Barrett, J. *See* Handwerger, Quarfordt, Barrett, and Harman.

Basci, A. *See* Shah, Baricos, and Basci.

Bast, B. J. E. G. *See* Lokhorst, Boom, Bast, Peters, Tedder, Gerdes, Petersen, and Ballieux.

Batshaw, M. L. *See* Moreadith, Cleeter, Ragan, Batshaw, and Lehninger.

Battey, J. F. *See* Kaye, McBride, Battey, Gazdar, and Sausville.

Batwin, H. *See* McNamara, Kolb, Parker, Batwin, Samuel, Brown, and Ahrens.

Baum, B. J. *See* Helman, Turner, Fox, and Baum.

Baum, M. Insulin stimulates volume absorption in the rabbit proximal convoluted tubule. 1104

Beasley, C. R. W., Robinson, C., Featherstone, R. L., Varley, J. G., Hardy, C. C., Church, M. K., and Holgate, S. T. 9α,11β-Prostaglandin F_2, a novel metabolite of prostaglandin D_2 is a potent contractile agonist of human and guinea pig airways. 978

Becker, L. C. *See* Levine, Moore, Weisman, Kadish, Becker, and Spear.

Beglinger, C. *See* Gyr, Beglinger, Köhler, Trautzl, Keller, and Bloom.

Behar, D. *See* Mukherjee, Svoronos, Ghazanfari, Martin, Fisher, Roecklein, Rodbard, Staton, Behar, Berg, and Manjunath.

Bellon, B., Manheimer-Lory, A., Monestier, M., Moran, T., Dimitriu-Bona, A., Alt, F., and Bona, C. High frequency of autoantibodies bearing cross-reactive idiotopes among hybridomas using V_H7183 genes prepared from normal and autoimmune murine strains. 1044

Belmonte, E. J. *See* Brass, Shaller, and Belmonte.

Contents

The Journal of Clinical Investigation
January 1987, Volume 79, Number 1

Perspectives

Circulating and tissue angiotensin systems. *D. J. Campbell* 1

Regular Articles

Suppressor T cell clones from patients with acute Epstein–Barr virus–induced infectious mononucleosis. *F. Wang, R. M. Blaese, K. C. Zoon, and G. Tosato* 7

Calcitonin stimulation of renal 25-hydroxyvitamin D–1α-hydroxylase activity in hypophosphatemic mice. Evidence that the regulation of calcitriol production is not universally abnormal in X-linked hypophosphatemia. *T. Nesbitt, B. Lobaugh, and M. K. Drezner* 15

Relationship of glucagon suppression by insulin and somatostatin to the ambient glucose concentration. *A. Starke, T. Imamura, and R. H. Unger* 20

Degradation of human glomerular basement membrane by stimulated neutrophils. Activation of a metalloproteinase(s) by reactive oxygen metabolites. *S. V. Shah, W. H. Baricos, and A. Basci* 25

Effect of formate on volume reabsorption in the rabbit proximal tubule. *L. Schild, G. Giebisch, L. P. Karniski, and P. S. Aronson* 32

Different hematologic phenotypes are associated with the leftward ($-\alpha^{4.2}$) and rightward ($-\alpha^{3.7}$) α^+-thalassemia deletions. *D. K. Bowden, A. V. S. Hill, D. R. Higgs, S. J. Oppenheimer, D. J. Weatherall, and J. B. Clegg* 39

Changes in amount and intracellular distribution of androgen receptor in human foreskin as a function of age. *C. G. Roehrborn, J. L. Lange, F. W. George, and J. D. Wilson* 44

Interleukin 1 induces cultured human endothelial cell production of granulocyte–macrophage colony-stimulating factor. *C. A. Sieff, S. Tsai, and D. V. Faller* 48

Effects of endothelial cell growth factor on bone remodelling in vitro. *E. Canalis, J. Lorenzo, W. H. Burgess, and T. Maciag* 52

Complementation analysis of fatty acid oxidation disorders. *A. Moon and W. J. Rhead* 59

Autoantibody to RNA polymerase I in scleroderma sera. *G. Reimer, K. M. Rose, U. Scheer, and E. M. Tan* 65

Regulation of sodium absorption by canine tracheal epithelium. *J. J. Cullen and M. J. Welsh* 73

Abnormal apical cell membrane in cystic fibrosis respiratory epithelium. An in vitro electrophysiologic analysis. *C. U. Cotton, M. J. Stutts, M. R. Knowles, J. T. Gatzy, and R. C. Boucher* 80

Tissue and cellular basis for impaired bone formation in aluminum-related osteomalacia in the pig. *A. B. Sedman, A. C. Alfrey, N. L. Miller, and W. G. Goodman* 86

c-*myc* gene inactivation during induced maturation of HL-60 cells. Transcriptional repression and loss of a specific DNAse I hypersensitive site. *K. A. High, C. A. Stolle, J. W. Schneider, W. Hu, and E. J. Benz, Jr.* 93

Constitutive expression of the granulocyte–macrophage colony-stimulating factor gene in acute myeloblastic leukemia. *D. C. Young, K. Wagner, and J. D. Griffin* . . . 100

Depression of action potential characteristics and a decreased space constant are present in postischemic, reperfused myocardium. *J. H. Levine, E. N. Moore, H. F. Weisman, A. H. Kadish, L. C. Becker, and J. F. Spear* 107

Fibrin induces release of von Willebrand factor from endothelial cells. *J. A. Ribes, C. W. Francis, and D. D. Wagner* 117

Endotoxin enhances tissue factor and suppresses thrombomodulin expression of human vascular endothelium in vitro. *K. L. Moore, S. P. Andreoli, N. L. Esmon, C. T. Esmon, and N. U. Bang* 124

Interactions of the platelets in paroxysmal nocturnal hemoglobinuria with complement. Relationship to defects in the regulation of complement and to platelet survival in vivo. *D. V. Devine, R. S. Siegel, and W. F. Rosse* 131

Urea permeability of mammalian inner medullary collecting duct system and papillary surface epithelium. *J. M. Sands and M. A. Knepper* 138

Sialic acid glycoproteins inhibit in vitro and in vivo replication of rotaviruses. *R. H. Yolken, R. Willoughby, S.-B. Wee, R. Miskuff, and S. Vonderfecht* 148

Exaggerated atrial arachidonate metabolism in rabbit left ventricular myocardial infarction. *A. S. Evers, C. G. Dunkel, J. E. Saffitz, and P. Needleman* 155

Effects of vitamin A deficiency and repletion on rat insulin secretion in vivo and in vitro from isolated islets. *B. S. Chertow, W. S. Blaner, N. G. Baranetsky, W. I. Sivitz, M. B. Cordle, D. Thompson, and P. Meda* 163

Impaired muscarinic endothelium-dependent relaxation and cyclic guanosine 5'-monophosphate formation in atherosclerotic human coronary artery and rabbit aorta. *C. Bossaller, G. B. Habib, H. Yamamoto, C. Williams, S. Wells, and P. D. Henry* 170

Selective suppression of insulin-induced proliferation of cultured human hepatoma cells by somatostatin. *C.-K. Chou, L.-T. Ho, L.-P. Ting, C.-p. Hu, T.-S. Su, W.-C. Chang, C.-S. Suen, M.-Y. Huang, and C. Chang* 175

Studies on the mechanism of ω-hydroxylation of platelet 12-hydroxyeicosatetraenoic acid (12-HETE) by unstimulated neutrophils. *A. J. Marcus, L. B. Safier, H. L. Ullman, N. Islam, M. J. Broekman, and C. von Schacky* 179

Detection of tissue kallikrein in the bronchoalveolar lavage fluid of asthmatic subjects. *S. C. Christiansen, D. Proud, and C. G. Cochrane* 188

Independent effects of aldosterone and potassium on induction of potassium adaptation in rat kidney. *B. Stanton, L. Pan, H. Deetjen, V. Guckian, and G. Giebisch* 198

Lipolysis during fasting. Decreased suppression by insulin and increased stimulation by epinephrine. *M. D. Jensen, M. W. Haymond, J. E. Gerich, P. E. Cryer, and J. M. Miles* 207

Increased expression of complement decay-accelerating factor during activation of human neutrophils. *M. Berger and M. E. Medof* 214

Pyocyanin and 1-hydroxyphenazine produced by *Pseudomonas aeruginosa* inhibit the beating of human respiratory cilia in vitro. *R. Wilson, T. Pitt, G. Taylor, D. Watson, J. MacDermot, D. Sykes, D. Roberts, and P. Cole* 221

Stimulation of inositol trisphosphate and diacylglycerol production in renal tubular cells by parathyroid hormone. *K. A. Hruska, D. Moskowitz, P. Esbrit, R. Civitelli, S. Westbrook, and M. Huskey* 230

Decreased kinase activity of insulin receptors from adipocytes of non–insulin-dependent diabetic subjects. *G. R. Freidenberg, R. R. Henry, H. H. Klein, D. R. Reichart, and J. M. Olefsky* 240

Extended major histocompatibility complex haplotypes in patients with gluten-sensitive enteropathy. *C. A. Alper, E. Fleischnick, Z. Awdeh, A. J. Katz, and E. J. Yunis* 251

Steroid-sensitive mechanism of soluble immune response suppressor production in steroid-responsive nephrotic syndrome. *H. W. Schnaper and T. M. Aune* 257

Reperfusion after acute coronary occlusion in dogs impairs endothelium-dependent relaxation to acetylcholine and augments contractile reactivity in vitro. *K. M. VanBenthuysen, I. F. McMurtry, and L. D. Horwitz* 265

Molecular mechanisms of McArdle's disease (muscle glycogen phosphorylase deficiency). RNA and DNA analysis. *S. Gautron, D. Daegelen, F. Mennecier, D. Dubocq, A. Kahn, and J.-C. Dreyfus* 275

Rapid Publications

Mapping the Lowe oculocerebrorenal syndrome to Xq24-q26 by use of restriction fragment length polymorphisms. *D. N. Silver, R. A. Lewis, and R. L. Nussbaum* 282

Human recombinant erythropoietin promotes differentiation of murine megakaryocytes in vitro. *T. Ishibashi, J. A. Koziol, and S. A. Burstein* 286

Low sodium diet corrects the defect in lymphocyte β-adrenergic responsiveness in hypertensive subjects. *R. D. Feldman, W. J. Lawton, and W. L. McArdle* 290

Intracellular conversion of thyroxine to triiodothyronine is required for the optimal thermogenic function of brown adipose tissue. *A. C. Bianco and J. E. Silva* 295

Complete complementary DNA–derived amino acid sequence of canine cardiac phospholamban. *J. Fujii, A. Ueno, K. Kitano, S. Tanaka, M. Kadoma, and M. Tada* 301

Enhancement of natural killer function through activation of the T11 E rosette receptor. *R. E. Schmidt, J. M. Michon, J. Woronicz, S. F. Schlossman, E. L. Reinherz, and J. Ritz* 305

Susceptibility to multiple sclerosis associated with an immunoglobulin gamma 3 restriction fragment length polymorphism. *C. N. Gaiser, M. J. Johnson, G. de Lange, L. Rassenti, L. L. Cavalli-Sforza, and L. Steinman* 309

Acute myeloblastic leukemia in paroxysmal nocturnal hemoglobinuria. Evidence of evolution from the abnormal paroxysmal nocturnal hemoglobinuria clone. *D. V. Devine, W. L. Gluck, W. F. Rosse, and J. B. Weinberg* 314

January Author Index 318

Contents

The Journal of Clinical Investigation
February 1987, Volume 79, Number 2

Perspectives

Secretory products of macrophages. *C. F. Nathan* 319

Regular Articles

Isolation of multiple normal and functionally defective forms of uridine diphosphate-glucuronosyltransferase from inbred Gunn rats. *N. Roy Chowdhury, F. Gross, A. D. Moscioni, M. Kram, I. M. Arias, and J. Roy Chowdhury* 327

Beta-adrenergic agonists increase lung liquid clearance in anesthetized sheep. *Y. Berthiaume, N. C. Staub, and M. A. Matthay* 335

Platelet-activating factor: mediator of the third pathway of platelet aggregation? A study in three patients with deficient platelet-activating factor synthesis. *A. Sturk, M. C. L. Schaap, J. W. ten Cate, H. S. A. Heymans, R. B. H. Schutgens, H. Przyrembel, and P. Borst* 344

Multipotential phenotypic expression of genes encoding peptide hormones in rat insulinoma cell lines. *J. Philippe, W. L. Chick, and J. F. Habener* 351

Myocardial metabolism of free fatty acids. Studies with ^{14}C-labeled substrates in humans. *J. A. Wisneski, E. W. Gertz, R. A. Neese, and M. Mayr* 359

Galactose ingestion increases vascular permeability and collagen solubility in normal male rats. *K. Chang, M. Tomlinson, J. R. Jeffrey, R. G. Tilton, W. R. Sherman, K. E. Ackermann, R. A. Berger, T. J. Cicero, C. Kilo, and J. R. Williamson* 367

Cleavage of protein S by a platelet membrane protease. *C. A. Mitchell and H. H. Salem* 374

Membrane transport influences the rate of accumulation of cytosine arabinoside in human leukemia cells. *J. C. White, J. P. Rathmell, and R. L. Capizzi* 380

Direct evidence that decreased serum opsonization of *Streptococcus pneumoniae* via the alternative complement pathway in sickle cell disease is related to antibody deficiency. *A. B. Bjornson and J. S. Lobel* 388

Indomethacin in vivo increases the sensitivity to *Listeria* infection in mice. A possible role for macrophage thromboxane A_2 synthesis. *C. S. Tripp, P. Needleman, and E. R. Unanue* 399

Suppression of peripheral blood natural killer cell activity by excess thyroid hormone. *M. Papic, J. Stein-Streilein, M. Zakarija, J. M. McKenzie, J. Guffee, and M. A. Fletcher* 404

Hepatic glucagon metabolism. Correlation of hormone processing by isolated canine hepatocytes with glucagon metabolism in man and in the dog. *W. A. Hagopian and H. S. Tager* 409

Foam cell–forming J774 macrophages have markedly elevated acyl coenzyme A:cholesterol acyl transferase activity compared with mouse peritoneal macrophages in the presence of low density lipoprotein (LDL) despite similar LDL receptor activity. *I. Tabas, G. C. Boykow, and A. R. Tall* 418

3α-Hydroxysteroid dehydrogenase activity of the Y′ bile acid binders in rat liver cytosol. Identification, kinetics, and physiologic significance. *A. Stolz, H. Takikawa, Y. Sugiyama, J. Kuhlenkamp, and N. Kaplowitz* 427

Bone marrow transplantation in canine mucopolysaccharidosis I. Effects within the central nervous system. *R. M. Shull, N. E. Hastings, R. R. Selcer, J. B. Jones, J. R. Smith, W. C. Cullen, and G. Constantopoulos* 435

Cardiotonic agent milrinone stimulates resorption in rodent bone organ culture. *N. S. Krieger, T. S. Stappenbeck, and P. H. Stern* 444

Insulinlike growth factor I regulation of growth hormone gene transcription in primary rat pituitary cells. *S. Yamashita and S. Melmed* 449

Relationship of insulin binding and insulin-stimulated tyrosine kinase activity is altered in type II diabetes. *R. J. Comi, G. Grunberger, and P. Gorden* 453

Congenital deficiency of two polypeptide subunits of the iron–protein fragment of mitochondrial complex I. *R. W. Moreadith, M. W. J. Cleeter, C. I. Ragan, M. L. Batshaw, and A. L. Lehninger* 463

Reversal of lymphocyte activation in vivo in the Kawasaki syndrome by intravenous gammaglobulin. *D. Y. M. Leung, J. C. Burns, J. W. Newburger, and R. S. Geha* 468

Protection against the lethal effects of pentobarbital in mice by a benzodiazepine receptor inverse agonist, 6,7-dimethoxy-4-ethyl-3-carbomethoxy-β-carboline. *H. Havoundjian, G. F. Reed, S. M. Paul, and P. Skolnick* 473

Potent in vitro and in vivo antitoxoplasma activity of the lipid-soluble antifolate trimetrexate. *C. J. Allegra, J. A. Kovacs, J. C. Drake, J. C. Swan, B. A. Chabner, and H. Masur* 478

Human giant cell tumors of bone. Identification and characterization of cell types. *S. R. Goldring, M. S. Roelke, K. K. Petrison, and A. K. Bhan* 483

Membrane skeletal alterations during in vivo mouse red cell aging. Increase in the band 4.1a:4.1b ratio. *T. J. Mueller, C. W. Jackson, M. E. Dockter, and M. Morrison* 492

Effects of atrial natriuretic factor on cyclic guanosine monophosphate and cyclic adenosine monophosphate accumulation in microdissected nephron segments from rats. *H. Nonoguchi, M. A. Knepper, and V. C. Manganiello* 500

Differential control of heart rate and sympathetic nerve activity during dynamic exercise. Insight from intraneural recordings in humans. *R. G. Victor, D. R. Seals, and A. L. Mark* 508

Lactic dehydrogenase isozymes, ^{31}P magnetic resonance spectroscopy, and in vitro antimitochondrial tumor toxicity with gossypol and rhodamine-123. *C. Benz, C. Hollander, M. Keniry, T. L. James, and M. Mitchell* 517

Epitope mapping of the von Willebrand factor subunit distinguishes fragments present in normal and type IIA von Willebrand disease from those generated by plasmin. *S. D. Berkowitz, J. Dent, J. Roberts, Y. Fujimura, E. F. Plow, K. Titani, Z. M. Ruggeri, and T. S. Zimmerman* 524

Role of activation of protein kinase C in the stimulation of colonic epithelial proliferation and reactive oxygen formation by bile acids. *P. A. Craven, J. Pfanstiel, and F. R. DeRubertis* 532

Molecular cloning of human synovial cell collagenase and selection of a single gene from genomic DNA. *C. E. Brinckerhoff, P. L. Ruby, S. D. Austin, M. E. Fini, and H. D. White* 542

Hyperglucagonemia and insulin-mediated glucose metabolism. *S. Del Prato, P. Castellino, D. C. Simonson, and R. A. DeFronzo* 547

Importance of the route of intravenous glucose delivery to hepatic glucose balance in the conscious dog. *B. A. Adkins, S. R. Myers, G. K. Hendrick, R. W. Stevenson, P. E. Williams, and A. D. Cherrington* 557

Monocyte–T lymphocyte interaction for regulation of insulin receptors on the activated T lymphocyte. *J. H. Helderman, R. Ayuso, J. Rosenstock, and P. Raskin* 566

Idiotypic markers of polyclonal B cell activation. Public idiotypes shared by monoclonal antibodies derived from patients with systemic lupus erythematosus or leprosy. *C. Mackworth-Young, J. Sabbaga, and R. S. Schwartz* 572

Detailed comparison of basal and food-stimulated gastric acid secretion rates and serum gastrin concentrations in duodenal ulcer patients and normal subjects. *A. J. Blair III, M. Feldman, C. Barnett, J. H. Walsh, and C. T. Richardson* 582

Dichloroacetate inhibits glycolysis and augments insulin-stimulated glycogen synthesis in rat muscle. *A. S. Clark, W. E. Mitch, M. N. Goodman, J. M. Fagan, M. A. Goheer, and R. T. Curnow* 588

Molecular heterogeneity of a lymphocyte glycoprotein in immunodeficient patients. *D. Reisinger and R. Parkman* 595

Changes in cytosolic Ca^{2+} associated with von Willebrand factor release in human endothelial cells exposed to histamine. Study of microcarrier cell monolayers using the fluorescent probe indo-1. *K. K. Hamilton and P. J. Sims* 600

HLA class II alpha chain gene polymorphisms in patients with insulin-dependent diabetes mellitus, dermatitis herpetiformis, and celiac disease. *G. A. Hitman, M. J. Niven, H. Festenstein, P. G. Cassell, J. Awad, J. Walker-Smith, J. N. Leonard, L. Fry, P. Ciclitira, P. Kumar, and J. A. Sachs* 609

Rapid Publications

Insulinotropin: glucagon-like peptide I (7-37) co-encoded in the glucagon gene is a potent stimulator of insulin release in the perfused rat pancreas. *S. Mojsov, G. C. Weir, and J. F. Habener* 616

Macrophages are required for influenza virus infection of human lymphocytes. *D. J. Mock, F. Domurat, N. J. Roberts, Jr., E. E. Walsh, M. R. Licht, and P. Keng* 620

Apolipoproteins AI, AII, and CI stimulate placental lactogen release from human placental tissue. A novel action of high density lipoprotein apolipoproteins. *S. Handwerger, S. Quarfordt, J. Barrett, and I. Harman* 625

Triiodothyronine enhances renal response to aldosterone in the rabbit collecting tubule. *C. Barlet and A. Doucet* 629

Release of mitogenic factors by cultured preadipocytes from massively obese human subjects. *D. C. W. Lau, D. A. K. Roncari, and C. H. Hollenberg* 632

Clonality of angioimmunoblastic lymphadenopathy and implications for its evolution to malignant lymphoma. *E. H. Lipford, H. R. Smith, S. Pittaluga, E. S. Jaffe, A. D. Steinberg, and J. Cossman* 637

Altered binding of ^{125}I-labeled calmodulin to a 46.5-kilodalton protein in skin fibroblasts cultured from patients with cystic fibrosis. *E. A. Tallant and R. W. Wallace* . . . 643

Localization of the gene for coagulation Factor XIII a-chain to chromosome 6 and identification of sites of synthesis. *L. J. Weisberg, D. T. Shiu, C. S. Greenberg, Y. W. Kan, and M. A. Shuman* 649

Increased single strand breaks in DNA of lymphocytes from diabetic subjects. *M. Lorenzi, D. F. Montisano, S. Toledo, and H.-C. H. Wong* 653

Distribution of glucose transporter messenger RNA transcripts in tissues of rat and man. *J. S. Flier, M. Mueckler, A. L. McCall, and H. F. Lodish* 657

Hemoglobin potentiates central nervous system damage. *S. M. H. Sadrzadeh, D. K. Anderson, S. S. Panter, P. E. Hallaway, and J. W. Eaton* 662

February Author Index 667

Contents

The Journal of Clinical Investigation
March 1987, Volume 79, Number 3

Perspectives

Tissue injury in inflammation. Oxidants, proteinases, and cationic proteins. *P. M. Henson and R. B. Johnston, Jr.* 669

Regular Articles

Effect of dietary fat saturation on plasma lipoproteins and high density lipoprotein metabolism of the rhesus monkey. *K. S. Chong, R. J. Nicolosi, R. F. Rodger, D. A. Arrigo, R. W. Yuan, J. J. MacKey, S. Georas, and P. N. Herbert* 675

Ammonia transport by early and late proximal convoluted tubule of the rat. *D. W. Good and T. D. DuBose, Jr.* 684

Effect of methotrexate on intracellular folate pools in purified myeloid precursor cells from normal human bone marrow. *J. Baram, C. J. Allegra, R. L. Fine, and B. A. Chabner* 692

Molecular basis for the deficiency of complement 1 inhibitor in type I hereditary angioneurotic edema. *M. Cicardi, T. Igarashi, F. S. Rosen, and A. E. Davis III* 698

Human adipocyte glucose transport system. Biochemical and functional heterogeneity of hexose carriers. *S. Matthaei, W. T. Garvey, R. Horuk, T. P. Hueckstaedt, and J. M. Olefsky* 703

A_1 and A_2 adenosine receptors in rabbit cortical collecting tubule cells. Modulation of hormone-stimulated cAMP. *L. J. Arend, W. K. Sonnenburg, W. L. Smith, and W. S. Spielman* 710

Demonstration of defective C3-receptor–mediated clearance by the reticuloendothelial system in patients with acquired immunodeficiency syndrome. *B. S. Bender, J. F. Bohnsack, S. H. Sourlis, M. M. Frank, and T. C. Quinn* 715

Comparative effects in vivo of recombinant murine interleukin 3, natural murine colony-stimulating factor-1, and recombinant murine granulocyte–macrophage colony-stimulating factor on myelopoiesis in mice. *H. E. Broxmeyer, D. E. Williams, S. Cooper, R. K. Shadduck, S. Gillis, A. Waheed, D. L. Urdal, and D. C. Bicknell* 721

Isolation of glycine betaine and proline betaine from human urine. Assessment of their role as osmoprotective agents for bacteria and the kidney. *S. T. Chambers and C. M. Kunin* 731

Relationship of increased plasma atrial natriuretic factor and renal sodium handling during immersion-induced central hypervolemia in normal humans. *M. Epstein, R. Loutzenhiser, E. Friedland, R. M. Aceto, M. J. F. Camargo, and S. A. Atlas* 738

Heterogeneity of the factor IX locus in nine hemophilia B inhibitor patients. *R. J. Matthews, D. S. Anson, I. R. Peake, and A. L. Bloom* 746

Calcitriol, parathyroid hormone, and accumulation of aluminum in bone in dogs with renal failure. *H. H. Malluche, M.-C. Faugere, R. M. Friedler, C. Matthews, and P. Fanti* 754

A defect of immunoregulatory T cell subsets in systemic lupus erythematosus patients demonstrated with anti–2H4 antibody. *C. Morimoto, A. D. Steinberg, N. L. Letvin, M. Hagan, T. Takeuchi, J. Daley, H. Levine, and S. F. Schlossman* 762

Actions of estradiol on discrete attributes of the luteinizing hormone pulse signal in man. Studies in postmenopausal women treated with pure estradiol. *J. D. Veldhuis, W. S. Evans, A. D. Rogol, M. O. Thorner, and P. Stumpf* 769

Glycemic thresholds for activation of glucose counterregulatory systems are higher than the threshold for symptoms. *N. S. Schwartz, W. E. Clutter, S. D. Shah, and P. E. Cryer* 777

Prostaglandin E_1 inhibits effector T cell induction and tissue damage in experimental murine interstitial nephritis. *C. J. Kelly, R. B. Zurier, K. A. Krakauer, N. Blanchard, and E. G. Neilson* 782

Equivalence of the insulin sensitivity index in man derived by the minimal model method and the euglycemic glucose clamp. *R. N. Bergman, R. Prager, A. Volund, and J. M. Olefsky* 790

Support of cultured hepatocytes by a laminin-rich gel. Evidence for a functionally significant subendothelial matrix in normal rat liver. *D. M. Bissell, D. M. Arenson, J. J. Maher, and F. J. Roll* 801

Monomeric (7S) IgM found in the serum of rheumatoid arthritis patients share idiotypes with pentameric (19S) monoclonal rheumatoid factors. *V. R. Bonagura, L. Menendez, N. Agostino, and B. Pernis* 813

Characterization and isolation of thyroid microsomal antigen. *N. Hamada, L. Portmann, and L. J. DeGroot* 819

Hemoglobin Mississippi (β^{44}ser → cys). Studies of the thalassemic phenotype in a mixed heterozygote with β^+-thalassemia. *M. H. Steinberg, J. G. Adams III, W. T. Morrison, D. J. Pullen, R. Abney, A. Ibrahim, and R. F. Rieder* 826

Two new inherited defects of the thyroxine-binding globulin (TBG) molecule presenting as partial TBG deficiency. *J. Takamatsu, S. Refetoff, M. Charbonneau, and J. H. Dussault* 833

Implications of anti-Ro/Sjögren's syndrome A antigen autoantibody in normal sera for autoimmunity. *K. K. Gaither, O. F. Fox, H. Yamagata, M. J. Mamula, M. Reichlin, and J. B. Harley* 841

Hereditary xanthinuria. Evidence for enhanced hypoxanthine salvage. *F. A. Mateos, J. G. Puig, M. L. Jiménez, and I. H. Fox* 847

Mechanism for enhanced glucose transport response to insulin in adipose cells from chronically hyperinsulinemic rats. Increased translocation of glucose transporters from an enlarged intracellular pool. *B. B. Kahn, E. S. Horton, and S. W. Cushman* 853

Constitutive and inducible secretion of platelet-derived growth factor analogs by human leukemic cell lines coexpressing erythroid and megakaryocytic markers. *Th. Papayannopoulou, E. Raines, S. Collins, B. Nakamoto, M. Tweeddale, and R. Ross* 859

Thrombospondin binds to monocytes–macrophages and mediates platelet–monocyte adhesion. *R. L. Silverstein and R. L. Nachman* 867

Histidyl–proline diketopiperazine (His–Pro DKP) immunoreactivity is present in the glucagon-containing cells of the human fetal pancreas. *P. Leduque, I. M. D. Jackson, A. Kervran, S. Aratan-Spire, P. Czernichow, and P.-M. Dubois* 875

Human platelet fraction arginine-vasopressin. Potential physiological role. *D. G. Bichet, M.-F. Arthus, J. N. Barjon, M. Lonergan, and C. Kortas* 881

Safety, infectivity, immunogenicity, and in vivo stability of two attenuated auxotrophic mutant strains of *Salmonella typhi*, 541Ty and 543Ty, as live oral vaccines in humans. *M. M. Levine, D. Herrington, J. R. Murphy, J. G. Morris, G. Losonsky, B. Tall, A. A. Lindberg, S. Svenson, S. Baqar, M. F. Edwards, and B. Stocker* 888

sn-1,2-Diacylglycerols and phorbol diesters stimulate thromboxane synthesis by *de novo* synthesis of prostaglandin H synthase in human promyelocytic leukemia cells. *M. Goerig, A. J. R. Habenicht, R. Heitz, W. Zeh, H. Katus, B. Kommerell, R. Ziegler, and J. A. Glomset* 903

Binding of quinine- and quinidine-dependent drug antibodies to platelets is mediated by the Fab domain of the immunoglobulin G and is not Fc dependent. *M. E. Smith, D. M. Reid, C. E. Jones, J. V. Jordan, C. A. Kautz, and N. R. Shulman* 912

Protein C prevents the coagulopathic and lethal effects of *Escherichia coli* infusion in the baboon. *F. B. Taylor, Jr., A. Chang, C. T. Esmon, A. D'Angelo, S. Vigano-D'Angelo, and K. E. Blick* 918

Antibodies to a 64,000 M_r human islet cell antigen precede the clinical onset of insulin-dependent diabetes. *S. Bækkeskov, M. Landin, J. K. Kristensen, S. Srikanta, G. J. Bruining, T. Mandrup-Poulsen, C. de Beaufort, J. S. Soeldner, G. Eisenbarth, F. Lindgren, G. Sundquist, and Å. Lernmark* 926

Stimulation of gastrin release by bombesin and canine gastrin-releasing peptides. Studies with isolated canine G cells in primary culture. *K. Sugano, J. Park, A. H. Soll, and T. Yamada* 935

Modulation of erythrocyte membrane mechanical stability by 2,3-diphosphoglycerate in the neonatal poikilocytosis/elliptocytosis syndrome. *W. C. Mentzer, Jr., T. A. Iarocci, N. Mohandas, P. A. Lane, B. Smith, J. Lazerson, and T. Hays* 943

Pathophysiology and pathogenesis of stunned myocardium. Depressed Ca^{2+} activation of contraction as a consequence of reperfusion-induced cellular calcium overload in ferret hearts. *H. Kusuoka, J. K. Porterfield, H. F. Weisman, M. L. Weisfeldt, and E. Marban* 950

A variant of Glanzmann's thrombasthenia with abnormal glycoprotein IIb–IIIa complexes in the platelet membrane. *A. T. Nurden, J.-P. Rosa, D. Fournier, C. Legrand, D. Didry, A. Parquet, and D. Pidard* 962

Myosin heavy chain messenger RNA and protein isoform transitions during cardiac hypertrophy. Interaction between hemodynamic and thyroid hormone–induced signals. *S. Izumo, A.-M. Lompré, R. Matsuoka, G. Koren, K. Schwartz, B. Nadal-Ginard, and V. Mahdavi* 970

9α,11β-Prostaglandin F_2, a novel metabolite of prostaglandin D_2 is a potent contractile agonist of human and guinea pig airways. *C. R. W. Beasley, C. Robinson, R. L. Featherstone, J. G. Varley, C. C. Hardy, M. K. Church, and S. T. Holgate* 978

Epidermal growth factor acts as a corticotropin-releasing factor in chronically catheterized fetal lambs. *D. H. Polk, M. G. Ervin, J. F. Padbury, R. W. Lam, A. L. Reviczky, and D. A. Fisher* 984

Unique alpha-spectrin mutant in a kindred with common hereditary elliptocytosis. *P. A. Lane, R. L. Shew, T. A. Iarocci, N. Mohandas, T. Hays, and W. C. Mentzer* 989

Rapid Publications

Suppression of anti–DNA antibody synthesis in vitro by a cross-reactive antiidiotypic antibody. *A. Epstein, M. Greenberg, B. Diamond, and A. I. Grayzel* 997

Elevated adenosine deaminase activity and hereditary hemolytic anemia. Evidence for abnormal translational control of protein synthesis. *E. G. Chottiner, H. J. Cloft, A. P. Tartaglia, and B. S. Mitchell* 1001

Induction of HL-60 differentiation by starvation for a single essential amino acid but not by protein synthesis inhibitors. *R. B. Pilz, G. Van den Berghe, and G. R. Boss* 1006

Leukocytes from four patients with complete or partial Leu-CAM deficiency contain the common β-subunit precursor and β-subunit messenger RNA. *N. Dana, L. K. Clayton, D. G. Tennen, M. W. Pierce, P. J. Lachmann, S. A. Law, and M. A. Arnaout* 1010

Perspectives

Expenditure and storage of energy in man. *E. A. H. Sims and E. Danforth, Jr.* 1019

Regular Articles

Apical membrane chloride/base exchange in the rat proximal convoluted tubule. *R. J. Alpern* 1026

Familial giant cell hepatitis associated with synthesis of 3β,7α-dihydroxy- and 3β,7α,12α-trihydroxy-5-cholenoic acids. *P. T. Clayton, J. V. Leonard, A. M. Lawson, K. D. R. Setchell, S. Andersson, B. Egestad, and J. Sjövall* 1031

Transketolase abnormality in cultured fibroblasts from familial chronic alcoholic men and their male offspring. *A. B. Mukherjee, S. Svoronos, A. Ghazanfari, P. R. Martin, A. Fisher, B. Roecklein, D. Rodbard, R. Staton, D. Behar, C. J. Berg, and R. Manjunath* 1039

High frequency of autoantibodies bearing cross-reactive idiotopes among hybridomas using V_H7183 genes prepared from normal and autoimmune murine strains. *B. Bellon, A. Manheimer-Lory, M. Monestier, T. Moran, A. Dimitriu-Bona, F. Alt, and C. Bona* 1044

Isolation of the thrombospondin membrane receptor. *A. S. Asch, J. Barnwell, R. L. Silverstein, and R. L. Nachman* 1054

Differential effects of hyperinsulinemia and hyperaminoacidemia on leucine-carbon metabolism in vivo. Evidence for distinct mechanisms in regulation of net amino acid deposition. *P. Tessari, S. Inchiostro, G. Biolo, R. Trevisan, G. Fantin, M. C. Marescotti, E. Iori, A. Tiengo, and G. Crepaldi* 1062

Uptake of oleate from albumin solutions by rat liver. Failure to detect catalysis of the dissociation of oleate from albumin by an albumin receptor. *R. A. Weisiger and W.-L. Ma* 1070

Bromocriptine and low dose cyclosporine in the treatment of experimental autoimmune uveitis in the rat. *A. G. Palestine, C. G. Muellenberg-Coulombre, M. K. Kim, M. C. Gelato, and R. B. Nussenblatt* 1078

Selective effects of cyclophosphamide therapy on activation, proliferation, and differentiation of human B cells. *L.-P. Zhu, T. R. Cupps, G. Whalen, and A. S. Fauci* 1082

Monoclonal antibody characterization of a chymotrypsin-like molecule on neutrophil membrane associated with cellular activation. *C. H. King, C. H. Goralnik, P. J. Kleinhenz, J. A. Marino, J. R. Sedor, and A. A. F. Mahmoud* 1091

Mechanisms for defects in muscle protein metabolism in rats with chronic uremia. Influence of metabolic acidosis. *R. C. May, R. A. Kelly, and W. E. Mitch* 1099

Insulin stimulates volume absorption in the rabbit proximal convoluted tubule. *M. Baum* 1104

Different patterns of postprandial lipoprotein metabolism in normal, type IIa, type III, and type IV hyperlipoproteinemic individuals. Effects of treatment with cholestyramine and gemfibrozil. *M. S. Weintraub, S. Eisenberg, and J. L. Breslow* 1110

Increased sensitivity of gastric acid secretion to gastrin in cirrhotic patients with portacaval shunt. *H. J. Lenz, T. Struck, H. Greten, M. A. Koss, V. E. Eysselein, J. H. Walsh, and J. I. Isenberg* 1120

In vivo regulation of human mononuclear leukocyte 3-hydroxy-3-methylglutaryl coenzyme A reductase. Studies in normal subjects. *H. J. Harwood, Jr., D. M. Bridge, and P. W. Stacpoole* 1125

Degradation of dipalmitoyl phosphatidylcholine by isolated rat granular pneumocytes and reutilization for surfactant synthesis. *A. Chander, J. Reicherter, and A. B. Fisher* 1133

Genetic epidemiology of susceptibility to leprosy. *E. D. Shields, D. A. Russell, and M. A. Pericak-Vance* 1139

Molecular cloning of a polymorphic DNA endonuclease fragment associates insulin-dependent diabetes mellitus with HLA-DQ. *B. Michelsen and Å. Lernmark* 1144

Treatment of acute myeloid leukemia cells in vitro with a monoclonal antibody recognizing a myeloid differentiation antigen allows normal progenitor cells to be expressed. *I. D. Bernstein, J. W. Singer, R. G. Andrews, A. Keating, J. S. Powell, B. H. Bjornson, J. Cuttner, V. Najfeld, G. Reaman, W. Raskind, D. M. C. Sutton, and P. J. Fialkow* 1153

Thymus-dependent and -independent regulation of Ia antigen expression in situ by cells in the synovium of rats with streptococcal cell wall–induced arthritis. Differences in site and intensity of expression in euthymic, athymic, and cyclosporin A–treated LEW and F344 rats. *R. L. Wilder, J. B. Allen, and C. Hansen* 1160

Hepatic disposition and biliary excretion of bilirubin and bilirubin glucuronides in intact rats. Differential processing of pigments derived from intra- and extrahepatic sources. *J. M. Crawford, B. J. Ransil, C. S. Potter, S. V. Westmoreland, and J. L. Gollan* 1172

Impact of physical training on the ultrastructure of midthigh muscle in normal subjects and in patients treated with glucocorticoids. *F. F. Horber, H. Hoopeler, J. R. Scheidegger, B. E. Grünig, H. Howald, and F. J. Frey* 1181

Vagal regulation of insulin, glucagon, and somatostatin secretion in vitro in the rat. *S. Nishi, Y. Seino, H. Ishida, M. Seno, T. Taminato, H. Sakurai, and H. Imura* 1191

Elevated bronchoalveolar lavage fluid histamine levels in allergic asthmatics are associated with methacholine bronchial hyperresponsiveness. *T. B. Casale, D. Wood, H. B. Richerson, S. Trapp, W. J. Metzger, D. Zavala, and G. W. Hunninghake* 1197

Hemophilia B (Christmas disease) variants and carrier detection analyzed by DNA probes. *M.-C. Poon, D. H. K. Chui, M. Patterson, D. M. Starozik, L. S. Dimnik, and D. I. Hoar* 1204

Growth advantage and enhanced toxicity of *Escherichia coli* adherent to tissue culture cells due to restricted diffusion of products secreted by the cells. *D. Zafriri, Y. Oron, B. I. Eisenstein, and I. Ofek* 1210

Accelerated transfer of cholesteryl esters in dyslipidemic plasma. Role of cholesteryl ester transfer protein. *A. Tall, E. Granot, R. Brocia, I. Tabas, C. Hesler, K. Williams, and M. Denke* 1217

Cell surface expression of fMet-Leu-Phe receptors on human neutrophils. Correlation to changes in the cytosolic free Ca^{2+} level and action of phorbol myristate acetate. *T. Andersson, C. Dahlgren, P. D. Lew, and O. Stendahl* 1226

Role of local immunosuppression in murine fetoplacental listeriosis. *R. W. Redline and C. Y. Lu* 1234

Crossreactivity and inheritance of idiotypes restricted to human anti-tetanus toxoid antibodies. *C. M. K. Brozek and R. S. Geha* 1242

1,25-Dihydroxyvitamin D stimulation test for osteoblast function in normal and osteoporotic postmenopausal women. *R. J. Duda, Jr., R. Kumar, K. I. Nelson, A. R. Zinsmeister, K. G. Mann, and B. L. Riggs* 1249

Gamma-interferon inhibits collagen synthesis in vivo in the mouse. *R. D. Granstein, G. F. Murphy, R. J. Margolis, M. H. Byrne, and E. P. Amento* 1254

Influence of Cl^- on organic anion transport in short-term cultured rat hepatocytes and isolated perfused rat liver. *A. W. Wolkoff, A. C. Samuelson, K. L. Johansen, R. Nakata, D. M. Withers, and A. Sosiak* 1259

Inositol 1,4,5-triphosphate–induced granule secretion in platelets. Evidence that the activation of phospholipase C mediated by platelet thromboxane receptors involves a guanine nucleotide binding protein-dependent mechanism distinct from that of thrombin. *L. F. Brass, C. C. Shaller, and E. J. Belmonte* 1269

Rapid Publications

Stoichiometry of Na^+–HCO_3^- cotransport in basolateral membrane vesicles isolated from rabbit renal cortex. *M. Soleimani, S. M. Grassl, and P. S. Aronson* 1276

Acute leukemia expressing the gamma gene product of the putative second T cell receptor. *R. González-Sarmiento, T. W. LeBien, J. G. Bradley, J. M. Greenberg, J. G. Seidman, S. Ang, and J. H. Kersey* 1281

Transforming growth factor–β increases steady state levels of type I procollagen and fibronectin messenger RNAs posttranscriptionally in cultured human dermal fibroblasts. *R. Raghow, A. E. Postlethwaite, J. Keski-Oja, H. L. Moses, and A. H. Kang* 1285

Perspectives

Antigen receptor genes as molecular markers of lymphoid neoplasms. *S. J. Korsmeyer* 1291

Regular Articles

Mechanism of killing of *Giardia lamblia* trophozoites by complement. *M. Deguchi, F. D. Gillin, and I. Gigli* . . . 1296

Short-chain acyl–coenzyme A dehydrogenase deficiency. Clinical and biochemical studies in two patients. *B. A. Amendt, C. Greene, L. Sweetman, J. Cloherty, V. Shih, A. Moon, L. Teel, and W. J. Rhead* 1303

^{99m}Tc-pertechnetate uptake in parotid acinar cells by the $Na^+/K^+/Cl^-$ co-transport system. *J. Helman, R. J. Turner, P. C. Fox, and B. J. Baum* 1310

Interaction of mouse macrophage elastase with native and oxidized human α_1-proteinase inhibitor. *M. J. Banda, E. J. Clark, S. Sinha, and J. Travis* 1314

Persistence of a reduced-collagen–producing phenotype in cultured scleroderma fibroblasts after short-term exposure to interferons. *M. R. Duncan and B. Berman* 1318

Developmental changes in the rat atriopeptin hormonal system. *Y. Wei, C. P. Rodi, M. L. Day, R. C. Wiegand, L. D. Needleman, B. R. Cole, and P. Needleman* 1325

Insulin receptor kinase in human skeletal muscle from obese subjects with and without noninsulin dependent diabetes. *J. F. Caro, M. K. Sinha, S. M. Raju, O. Ittoop, W. J. Pories, E. G. Flickinger, D. Meelheim, and G. L. Dohm* 1330

Metallothionein messenger RNA regulation in the mottled mouse and Menkes kinky hair syndrome. *S. Packman, R. D. Palmiter, M. Karin, and C. O'Toole* 1338

Mechanisms underlying the differential effects of ethanol on the bioavailability of riboflavin and flavin adenine dinucleotide. *J. Pinto, Y. P. Huang, and R. S. Rivlin* 1343

Modulation of rat skeletal muscle branched-chain α-keto acid dehydrogenase in vivo. Effects of dietary protein and meal consumption. *K. P. Block, R. P. Aftring, W. B. Mehard, and M. G. Buse* 1349

Calcium ionophore, phorbol ester, and chemotactic peptide-induced cytoskeleton reorganization in human neutrophils. *T. H. Howard and D. Wang* 1359

Vitamin D binding protein sequesters monomeric actin in the circulation of the rat. *K. D. Harper, J. F. McLeod, M. A. Kowalski, and J. G. Haddad* 1365

Corticosteroids and surfactant change lung function and protein leaks in the lungs of ventilated premature rabbits. *M. Ikegami, D. Berry, T. ElKady, A. Pettenazzo, S. Seidner, and A. Jobe* 1371

New mechanism for glomerular injury. Myeloperoxidase-hydrogen peroxide-halide system. *R. J. Johnson, W. G. Couser, E. Y. Chi, S. Adler, and S. J. Klebanoff* 1379

Intrinsic bioactivity of thyrotropin in human serum is inversely correlated with thyroid hormone concentrations. Application of a new bioassay using the FRTL-5 rat thyroid cell strain. *P. A. Dahlberg, P. A. Petrick, M. Nissim, M. M. Menezes-Ferreira, and B. D. Weintraub* 1388

Carrier detection in X-linked severe combined immunodeficiency based on patterns of X chromosome inactivation. *J. M. Puck, R. L. Nussbaum, and M. E. Conley* 1395

Novel type of proliferating lymphoplasmacytoid cell with a characteristic spotted immunofluorescence pattern. *H. M. Lokhorst, S. E. Boom, B. J. E. G. Bast, P. J. Peters, T. F. Tedder, J. Gerdes, E. Petersen, and R. E. Ballieux* 1401

Human creatine kinase-B complementary DNA. Nucleotide sequence, gene expression in lung cancer, and chromosomal assignment to two distinct loci. *F. J. Kaye, O. W. McBride, J. F. Battey, A. F. Gazdar, and E. A. Sausville* 1412

Human monoclonal antibodies that recognize conserved epitopes in the core–lipid A region of lipopolysaccharides. *M. Pollack, A. A. Raubitschek, and J. W. Larrick* 1421

Steroid administration after myocardial infarction promotes early infarct expansion. A study in the rat. *J. A. Mannisi, H. F. Weisman, D. E. Bush, P. Dudeck, and B. Healy* 1431

Inhibition of human endothelial cell proliferation by gold compounds. *T. Matsubara and M. Ziff* 1440

Hypokalemic nephropathy in the rat. Role of ammonia in chronic tubular injury. *J. P. Tolins, M. K. Hostetter, and T. H. Hostetter* 1447

Gene deletions correlate with the development of alloantibodies in von Willebrand disease. *B. B. Shelton-Inloes, F. F. Chehab, P. M. Mannucci, A. B. Federici, and J. E. Sadler* 1459

Phospholipid liposomes acquire apolipoprotein E in atherogenic plasma and block cholesterol loading of cultured macrophages. *K. J. Williams, A. R. Tall, C. Bisgaier, and R. Brocia* 1466

Relation between geometric dimensions of coronary artery stenoses and myocardial perfusion reserve in man. *R. A. Goldstein, R. L. Kirkeeide, L. L. Demer, M. Merhige, A. Nishikawa, R. W. Smalling, N. A. Mullani, and K. L. Gould* 1473

Role of sorbitol accumulation and *myo*-inositol depletion in paranodal swelling of large myelinated nerve fibers in the insulin-deficient spontaneously diabetic bio-breeding rat. Reversal by insulin replacement, an aldose reductase inhibitor, and *myo*-inositol. *D. A. Greene, S. Chakrabarti, S. A. Lattimer, and A. A. F. Sima* 1479

Variation of erythroid and myeloid precursors in the marrow and peripheral blood of volunteer subjects infected with human parvovirus (B19). *C. G. Potter, A. C. Potter, C. S. R. Hatton, H. M. Chapel, M. J. Anderson, J. R. Pattison, D. A. J. Tyrrell, P. G. Higgins, J. S. Willman, H. F. Parry, and P. M. Cotes* 1486

n-Butyrate inhibition of hyaluronate synthesis in cultured human fibroblasts. *T. J. Smith* 1493

Platelet-activating factor mediates hemodynamic changes and lung injury in endotoxin-treated rats. *S.-W. Chang, C. O. Feddersen, P. M. Henson, and N. F. Voelkel* 1498

Correction of hyperglycemia with phlorizin normalizes tissue sensitivity to insulin in diabetic rats. *L. Rossetti, D. Smith, G. I. Shulman, D. Papachristou, and R. A. DeFronzo* 1510

Parasite-specific anergy in human filariasis. Insights after analysis of parasite antigen-driven lymphokine production. *T. B. Nutman, V. Kumaraswami, and E. A. Ottesen* 1516

Rapid Publications

Novobiocin enhances alkylating agent cytotoxicity and DNA interstrand crosslinks in a murine model. *J. P. Eder, B. A. Teicher, S. A. Holden, K. N. S. Cathcart, and L. E. Schnipper* 1524

Immunological regulation of synaptic transmission in isolated guinea pig autonomic ganglia. *D. Weinreich and B. J. Undem* 1529

Immunochemical study of uroporphyrinogen decarboxylase in a patient with mild hepatoerythropoietic porphyria. *H. Fujita, S. Sassa, A. C. Toback, and A. Kappas* 1533

Regulation of inositol 1,4,5-trisphosphate kinase activity after stimulation of human T cell antigen receptor. *J. B. Imboden and G. Pattison* 1538

Rapid transcriptional down-regulation of *c-myc* expression during cyclic adenosine monophosphate–promoted differentiation of leukemic cells. *A. Slungaard, D. L. Confer, and W. H. Schubach* 1542

Role of nicotinamide adenine dinucleotide and adenosine triphosphate in glucocorticoid-induced cytotoxicity in susceptible lymphoid cells. *N. A. Berger, S. J. Berger, D. C. Sudar, and C. W. Distelhorst* 1558

Conversion of xanthine dehydrogenase to oxidase in ischemic rat tissues. *T. D. Engerson, T. G. McKelvey, D. B. Rhyne, E. B. Boggio, S. J. Snyder, and H. P. Jones* 1564

Intestinal adaptation to diabetes. Altered Na-dependent nutrient absorption in streptozocin-treated chronically diabetic rats. *R. N. Fedorak, E. B. Chang, J. L. Madara, and M. Field* 1571

Alveolar liquid pressure measured by micropuncture in isolated lungs of mature and immature fetal rabbits. *J. U. Raj* 1579

Evidence that a 210,000-molecular-weight glycoprotein (GP 210) serves as a platelet Fc receptor. *R. B. Stricker, P. T. Reyes, L. Corash, and M. A. Shuman* 1589

Circulating somatostatin. Physiological regulator of pancreatic function? *K. Gyr, C. Beglinger, E. Köhler, U. Trautzl, U. Keller, and S. R. Bloom* 1595

Interaction between lymphocytes and platelets in the synthesis of prostacyclin. *K. K. Wu, A. C. Papp, C. E. Manner, and E. R. Hall* 1601

Polymorphism of lymphocyte function–associated antigen-1 demonstrated by a lupus patient's alloantiserum. *K. D. Pischel, S. D. Marlin, T. A. Springer, V. L. Woods, Jr., and H. G. Bluestein* 1607

Effect of proximal gastric vagotomy on calculated gastric HCO_3^- and nonparietal volume secretion in man. Studies during basal conditions and gastrin-17 infusion. *M. Feldman, A. J. Blair III, and C. T. Richardson* 1615

Sodium-potassium pump, ion fluxes, and cellular dehydration in sickle cell anemia. *H. Izumo, S. Lear, M. Williams, R. Rosa, and F. H. Epstein* 1621

myc family oncogene amplification in tumor cell lines established from small cell lung cancer patients and its relationship to clinical status and course. *B. E. Johnson, D. C. Ihde, R. W. Makuch, A. F. Gazdar, D. N. Carney, H. Oie, E. Russell, M. M. Nau, and J. D. Minna* 1629

Study of the molecular mechanism of decreased liver synthesis of albumin in inflammation. *H. J. Moshage, J. A. M. Janssen, J. H. Franssen, J. C. M. Hafkenscheid, and S. H. Yap* 1635

Quantitation of fragment X formation during thrombolytic therapy with streptokinase and tissue plasminogen activator. *J. Owen, K. D. Friedman, B. A. Grossman, C. Wilkins, A. D. Berke, and E. R. Powers* 1642

Recombinant murine granulocyte macrophage colony-stimulating factor has megakaryocyte colony-stimulating activity and augments megakaryocyte colony stimulation by interkeukin 3. *B. E. Robinson, H. E. McGrath, and P. J. Quesenberry* 1648

Circulating dihydrotestosterone may not reflect peripheral formation. *V. Toscano and R. Horton* 1653

Regulation of lymphokine production and human T lymphocyte activation by 1,25-dihydroxyvitamin D_3. Specific inhibition at the level of messenger RNA. *W. F. C. Rigby, S. Denome, and M. W. Fanger* 1659

Oxidant-mediated epithelial cell injury in idiopathic pulmonary fibrosis. *A. M. Cantin, S. L. North, G. A. Fells, R. C. Hubbard, and R. G. Crystal* 1665

Rapid clearance of a structural isomer of bilirubin during phototherapy. *J. F. Ennever, A. T. Costarino, R. A. Polin, and W. T. Speck* 1674

Phenotypic and functional characterization of lymphocytes that bind human microvascular endothelial cells in vitro. Evidence for preferential binding of natural killer cells. *J. R. Bender, R. Pardi, M. A. Karasek, and E. G. Engleman* 1679

Clinical diversity in glycogenosis type II. Biosynthesis and in situ localization of acid α-glucosidase in mutant fibroblasts. *A. J. J. Reuser, M. Kroos, R. Willemsen, D. Swallow, J. M. Tager, and H. Galjaard* 1689

Granulocyte–macrophage colony-stimulating factor. Sensitive and receptor-mediated regulation by 1,25-dihydroxyvitamin D_3 in normal human peripheral blood lymphocytes. *A. Tobler, J. Gasson, H. Reichel, A. W. Norman, and H. P. Koeffler* 1700

Vitamin D_3 and cardiovascular function in rats. *R. E. Weishaar and R. U. Simpson* 1706

Kinetics of glucose disposal in whole body and across the forearm in man. *H. Yki-Järvinen, A. A. Young, C. Lamkin, and J. E. Foley* 1713

Human granulocyte–macrophage colony-stimulating factor induces expression of the tumor necrosis factor gene by the U937 cell line and by normal human monocytes. *S. A. Cannistra, A. Rambaldi, D. R. Spriggs, F. Herrmann, D. Kufe, and J. D. Griffin* 1720

Heterogeneity of cholesterol homeostasis in man. Response to changes in dietary fat quality and cholesterol quantity. *D. J. McNamara, R. Kolb, T. S. Parker, H. Batwin, P. Samuel, C. D. Brown, and E. H. Ahrens, Jr.* 1729

Metabolism of reverse triiodothyronine by isolated rat hepatocytes. *S. J. Eelkman Rooda, M. A. C. van Loon, and T. J. Visser* 1740

Tissue plasminogen activator promotes platelet disaggregation in plasma. *J. Loscalzo and D. E. Vaughan* 1749

Administration in vivo of recombinant interleukin 2 protects mice against septic death. *C. Weyand, J. Goronzy, C. G. Fathman, and P. O'Hanley* 1756

Metabolism of immunoglobulin E in patients with markedly elevated serum immunoglobulin E levels. *S. C. Dreskin, P. K. Goldsmith, W. Strober, L. A. Zech, and J. I. Gallin* 1764

L-Triiodothyronine stimulates growth by means of an autocrine factor in a cultured growth hormone–producing cell line. *M. J. Miller, E. C. Fels, L. E. Shapiro, and M. I. Surks* 1773

Isolation from human calcium oxalate renal stones of nephrocalcin, a glycoprotein inhibitor of calcium oxalate crystal growth. Evidence that nephrocalcin from patients with calcium oxalate nephrolithiasis is deficient in γ-carboxyglutamic acid. *Y. Nakagawa, M. Ahmed, S. L. Hall, S. Deganello, and F. L. Coe* 1782

Aspirin prolongs bleeding time in uremia by a mechanism distinct from platelet cyclooxygenase inhibition. *F. Gaspari, G. Viganò, S. Orisio, M. Bonati, M. Livio, and G. Remuzzi* 1788

Glomerulonephritis induced in the rabbit by antiendothelial antibodies. *S. Matsuo, A. Fukatsu, M. L. Taub, P. R. B. Caldwell, J. R. Brentjens, and G. Andres* 1798

Changes in catecholamine-induced lipolysis in isolated human fat cells during the first year of life. *C. Marcus, B. Karpe, P. Bolme, T. Sonnenfeld, and P. Arner* 1812

Neutral endopeptidase-like enzyme controls the contractile activity of substance P in guinea pig lung. *N. P. Stimler-Gerard* 1819

Specific affinity between fibronectin and the epidermolysis bullosa acquisita antigen. *D. T. Woodley, E. J. O'Keefe, J. A. McDonald, M. J. Reese, R. A. Briggaman, and W. R. Gammon* 1826

Characterization of an abnormal species of apolipoprotein B, apolipoprotein B-37, associated with familial hypobetalipoproteinemia. *S. G. Young, S. J. Bertics, L. K. Curtiss, and J. L. Witztum* 1831

Genetic analysis of a kindred with familial hypobetalipoproteinemia. Evidence for two separate gene defects: one associated with an abnormal apolipoprotein B species, apolipoprotein B-37; and a second associated with low plasma concentrations of apolipoprotein B-100. *S. G. Young, S. J. Bertics, L. K. Curtiss, B. W. Dubois, and J. L. Witztum* 1842

Effects of norepinephrine infusion on myocardial high-energy phosphate content and turnover in the living rat. *J. A. Bittl, J. A. Balschi, and J. S. Ingwall* 1852

Metabolism of platelet-activating factor in isolated perfused rat lung. *P. E. Haroldsen, N. F. Voelkel, J. E. Henson, P. M. Henson, and R. C. Murphy* 1860

Rapid Publications

Recombinant tumor necrosis factor/cachectin and interleukin 1 pretreatment decreases lung oxidized glutathione accumulation, lung injury, and mortality in rats exposed to hyperoxia. *C. W. White, P. Ghezzi, C. A. Dinarello, S. A. Caldwell, I. F. McMurtry, and J. E. Repine* 1868

Inhibitor of the Factor VIIa–tissue factor complex is reduced in patients with disseminated intravascular coagulation but not in patients with severe hepatocellular disease. *M. S. Bajaj, S. V. Rana, R. B. Wysolmerski, and S. P. Bajaj* 1874

Gangliosides shed by tumor cells enhance tumor formation in mice. *S. Ladisch, S. Kitada, and E. F. Hays* 1879

Human immunodeficiency virus infection down-regulates HLA class II expression and induces differentiation in promonocytic U937 cells. *A. J. C. Petit, F. G. Terpstra, and F. Miedema* 1883
